

CITRON™

A WATER CONDITIONING ADJUVANT

(NOT A PLANT FOOD PRODUCT)

Product No: 1501

(4) packages per case
45 cases per pallet

Gallons Treated: 2,000 gal.

Net Weight: 11 lbs.

One package treats 500 gallons.

CITRON is an acid based adjuvant that reinforces the chemical activity of the glyphosate molecule in certain contact herbicides by preventing antagonisms with carrier water cations. In turn, the chemical (glyphosate) adheres better to the leaf allowing for increased absorption by the plant tissue. In addition, CITRON also increases the half-life of many other pesticides and fungicides.

DIRECTIONS FOR APPLICATION

- Fill tank to desired water level.
- Add CITRON at a rate of 2.2 lbs. per 100 gallons of water for Glyphosate.
- Add CITRON at a rate of 1.1 lbs. per 100 gallons of water for all other compatible pesticides and fungicides.
- Add pesticide or fungicide at manufacturers suggested rate.
- **DO NOT USE CITRON WITH SULFONLUREAS.**

For a complete list of all compatible chemicals that can be used with CITRON, please visit www.intxllc.com.

STORAGE RECOMMENDATIONS

- Store in a cool, dry place in the original, unopened package.
- Completely empty contents of bag into spray tank.
- Empty bags should be disposed of properly.

PRECAUTIONARY INFORMATION

- CITRON may cause skin or respiratory irritation.
- If product comes in contact with eyes, flush with water for at least 15 minutes and seek medical attention.
- Avoid direct contact with skin and wash clothes that come in contact with product separately.
- Always wear a ventilation system or dust mask and avoid breathing dust or fumes.
