Glomus clarum

Glomus deserticola

Glomus microaggregatum

Ectomycorrhizal species

Pisolithus tinctorius

Rhizopogon

Mycro Root Dip™ A diverse blend of nutrients and soil microorganisms that aid in reducing transplant shock, increase nutrient uptake, enhanced with a moisture retention agent.

RECOMMENDED RATE:

1 lb per 500 transplants

DIRECTIONS FOR USE:

1. Mix 1 lb with 4 gallons of water or a 50/50 blend of water and SP-1 (Larger root masses will require more water for thorough coverage).
2. Allow blend to stabilize for at least ½ hour prior to use.
3. Immerse roots in solution prior to transplant.
4. Agitate while dipping roots to keep particles suspended.
5. Always water each transplant adequately.

When using dry products, always use proper safety equipment (dust masks, goggles, gloves)

CAUTION: KEEP OUT OF REACH OF CHILDREN. This product is not intended for human consumption. Avoid contact with eyes and open wounds. Rinse contacted areas with water. If swallowed, drink water and consult a physician. Wash hands after use.
